Meet at the Martin Road Gate @ 9:00am.**

## Presidents Message

Well another summer has just about slipped past us and what a sunny dry summer it has been. I hope you have had a chance to enjoy the season and the things that make Cape Cod so special in the summer. I have heard stories of many of our CCTU members doing some good fishing on Cape and elsewhere.

This is a "lite" edition of the monthly Rollcast Newsletter. Red Quill has been working hard since getting back on his feet on the always enjoyable Random Casts section. However we have been trying to work out some computer technical issues and were not able to include it here. As soon as this is resolved it will be sent out to you.

September is also the month we begin our monthly Chapter meetings. Our first will be the annual cookout for all members. We will be holding the cookout at the Oakcrest Cove on Peters Pond in Sandwich. Like all our regular monthly meetings it will be held on the second Wednesday of the month September 14<sup>th</sup>. The gathering will start at 4:00pm and we will have food ready to serve beginning at 5:00pm. Stop by, say hi, have something to eat, and get caught up on the latest hot spots and fishing stories

I hope you will be able to attend the upcoming events and participate in many more activities occurring now and in the months ahead.

Tight lines,

Dan Tobin  
President CCTU

### Quashnet River

Our monthly workday will be held on Sunday September 11<sup>th</sup>. The meeting place is the gate on Martin Road in Falmouth. If you are available come on out. Bring a pair of waded and work gloves and spend some time working and learning about this little stream.

Electroshocking - Also this month the Steve Hurley of the Massachusetts Fish and Wildlife Southeast District will be doing some electroshocking of the fish in the river. The electroshocking will take place on Wednesday September 21st and Thursday September 22<sup>nd</sup>. Volunteers are needed to help with this project. If you are available please come by to help out. Volunteers will be meeting at 9:00am at the Martin Road gate. Please wear waders that do not leak. This is very interesting work and the data obtained by counting and measuring the fish is very important research for the future of this and other salter brook trout rivers.

Check out the following pictures of work done on at the July work day constructing a J-Dam along the river. Thanks to Francis Smith and his hard working crew of river workers for all their hard work!
